

An architectural rendering of a modern school building. The building features a mix of materials: white walls, dark grey accents, and light-colored vertical slats. A prominent feature is a large, dark-framed window on the upper floor. The ground floor is constructed of brick. In the foreground, a paved walkway leads through a courtyard with greenery and a small tree. Several students with backpacks are walking along the path. The sky is blue with light clouds.

Envoplan Edubuild

A New Approach to MMC

ENVOPLAN™

Edubuild

40 Years Of Education

Continually Evolving

Envoplan was started as a family partnership in 1975. 40 years later it is a global enterprise with clients from the USA to Europe as well as in every part of the United Kingdom.

A continual spirit of innovation and creativity is what drives us forward at Envoplan Group, we are always looking for a fresh challenge and opportunity, however our founding principles of 'putting the customer first' and 'always be relevant' remain rock solid and at the heart of every decision we make.

Envoplan initially serviced the commercial furniture and fit out industry and completed a wide range of projects in all industries. Our work took us into the Education sector and before too long we realised that this was our future. The combination of our ethos, creativity and desire for improving the lives of our clients was a perfect match with the rapidly changing world of education in the 21st Century.

We found that the application of cutting-edge commercial design principles to education environments enabled us to offer our clients the solutions that enabled them to dramatically improve the appeal and functionality of their learning spaces. Furthermore, with the development of our sector leading, academic led, consultancy division – Noble and Eaton, we are now able to ensure every design is truly optimised for educators and students alike.

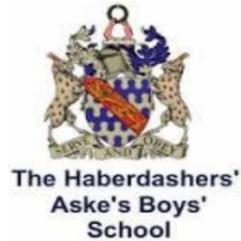

This innovative, market leading approach has resulted in the completion of numerous projects in all areas of the education environment from boarding houses to washrooms, science laboratories to learning commons. Our partnership with many suppliers and factories has enabled us to produce our own ranges of furniture and education specific solutions which now help our clients to provide a better learning experience for students worldwide every day.

- Tudor Hall School
- Westminster Cathedral Choir School
- Whitgift School

Company History

Home facilities are outgrown and first premises bought in East Lane, Wembley. Now offering 'all things for the modern office', including office furniture, equipment and envelopes. The name Envoplan is born.

The concept of Storgewall is born with first installation in a bedroom at the founder's home. Early manufacturing takes place by hand. The Storgewall of today still closely matches the original inspired design.

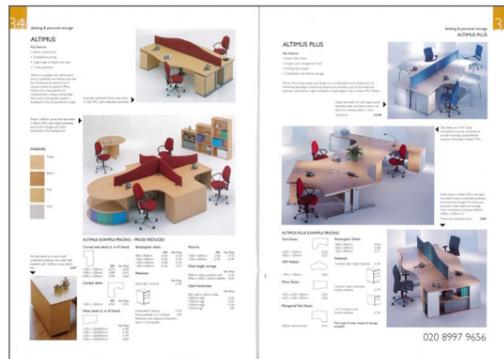

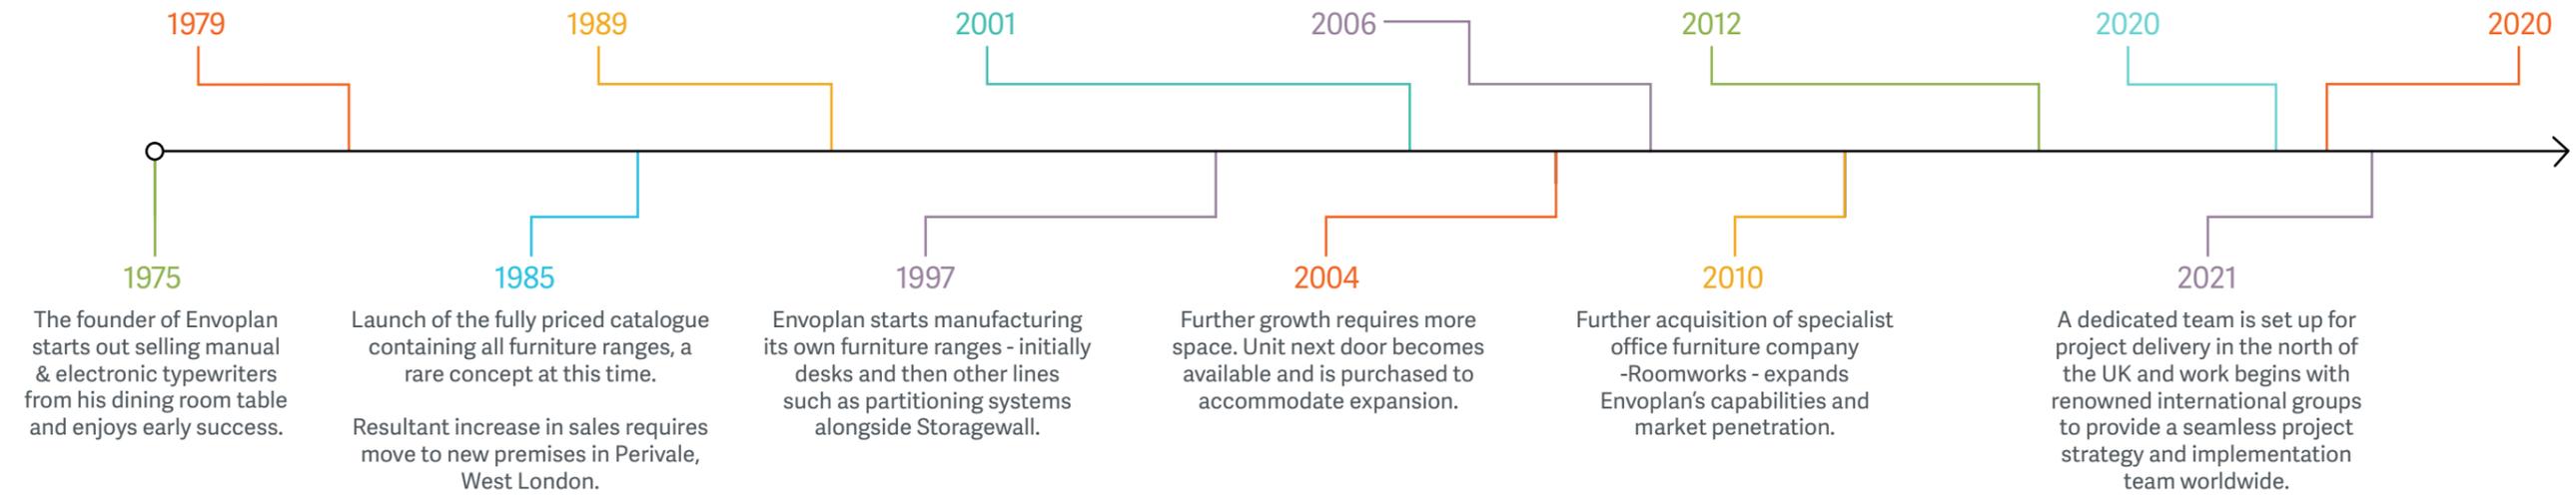

The next Envoplan innovation is released in the travelling Roadshow Trailer, bringing information and samples to customers' doors. It travels widely within London and goes as far as Scotland.

Acquisition of another business, Office Initiative, strengthens Envoplan's competency in fit-out and provides platform for total refurbishment offering.

Envoplan becomes LLP and moves to new headquarters in Eaton Road, Hemel Hempstead. Almost two times larger than Perivale it provides scope for major expansion.

The Noble & Eaton education design consultancy brand is launched, enabling the educational impact of designed learning environments to be more specific and bringing neuro-inclusive design to the forefront of our work.

Due to popular demand, Envoplan and Noble & Eaton begin their work across global networks to create an international design strategic design consultancy programme.

Our Service

Edubuild™

Your Educated MMC Partner

Product First, Not Production First

One of the biggest mistakes that is made when approaching a modular construction project is to allow the manufacturer to drive the design. If you were to imagine the iPhone or any other quality product being designed exclusively by the manufacturer of that product, the result would be quite different to what we have now.

In short, the manufacturer should not drive the product design or the procurement process as they currently do in the MMC sector. Edubuild™ takes the steering wheel when it comes to design. The Edubuild™ team become your “educated” MMC partner, managing the manufacturing supply chain to not only push design boundaries to better suit your needs but to ensure that costs are managed, and risk is mitigated as effectively as possible.

Edubuild™ achieves greater ROI, lower risk and more design flexibility by leading the design process with more information than any other modular contractor, through understanding how and why the MMC sector is different to traditional construction we leverage our expertise, data and knowledge on behalf of our client to achieve a better result than the “eggs in one basket” approach of selecting a manufacturer too early in the process.

Edubuild™

Your Educated MMC Partner

Our Approach

Our close, established relationships with a large proportion of DfE framework approved manufacturers has allowed us to build a “network” of modular production partners. Working collaboratively across our supply chain, our standardised product approach means our buildings can be manufactured by any one of our production partners, a selection of which are shown below:

Edubuild™

Your Educated MMC Partner

Our Approach

Utilising a network of manufacturers allows us to “defer” the decision point at which we engage the manufacturer in relation to the RIBA stages. Current practice is to engage a manufacturer prior to RIBA 3, “locking-in” the manufacturer and their specific system details, constraints and features. This approach leads to a building that is suited only for that manufacturers system...and their price!

→
We engage the manufacturer later and produce a higher level of detail early so that we can drive costs down and maximise margins in production.

We design the building at RIBA 3 with multiple manufacturers in-mind, allowing costs to be tightly managed and designs to be developed that aren't driven by the manufacturer's preferences, but rather the client's choices. Our level of supply chain knowledge alongside the detailed level of information we produce is key to leverage the benefits of our approach.

Managing Risk Factors with Modern Methods of Construction (MMC)

Recent events in the modular build and education arena have understandably caused concern with end users contemplating procurement along the lines of the Modern Methods of Construction (MMC1/2) government guidance. Our expert team have analysed the contributory factors and through what we have identified we believe these challenges were avoidable.

Our unique approach to modular construction methods enables us to maintain critical controls that ensures both excellent value and the ability to deliver to compressed time frames without compromising on quality. In the table below we flag the main trigger events that can cause project failure together with solutions how these can be addressed in a proactive manner.

By proactively managing out risk, we are able to ensure on-time delivery, strict quality processes and control over every element of design. This table sets out how systemic issues will be specifically addressed and managed out from the immediate point of instruction. Our whole proposal is predicated on this forward-thinking approach.

IDENTIFIED RISK	DELAYED START	PRODUCTION DELAYS	COST ESCALATION	STRUCTURAL FAILURE	CONTRACTOR FINANCIAL FAILURE	DLAYED COMPLETION	NOT FIT FOR PURPOSE
CONTRIBUTORY FACTORS	Client decision delays	Late signoffs	Poor buying	Inadequate controls	Under-pricing	Any combination of these factors	Inappropriate specifications
	Planning approval delays	Single site of failure (SPOF)	Poor site management	Excessive emphasis on value engineering	Poor cashflow		Lack of knowhow
			Late signoffs/ variations		Supply chain issues		Excessive emphasis on value engineering
ACTION	Teamwork	Est supply chain/ no SPOF	Est supply chain/ no SPOF	Est supply chain/ no SPOF	Est supply chain/ no SPOF	Est supply chain/ no SPOF Process Knowhow	Quality brief/R&D
	Process	Process	Process	Process	Process		Process
	Quality scheme, engage early with planners		Introduce competitive tension early in process	Quality of team			Teamwork

Meet The Team

Executive Team

Jeremy Tuffin

Head of Projects - Edubuild Division

Jeremy has been in the industry for over 15 years. He oversees the safe and timely Construction and Delivery Phase of all projects and thrives on bringing different skill sets together to form something greater than the sum of the parts.

Glyn Evershed

Envoplan Group Operations Director

With over twenty years of experience in the construction sector and an in-depth knowledge of education design, Glyn now leads a team of professional and dedicated individuals dedicated to improving students' lives and educational outcomes globally.

Nick Siderfin

Envoplan Group Chairman

With a 35-year global career in business, Nick has excelled in the construction industry, championing sound business principles. His expertise ensures success and promotes excellence within the company.

Mark Ferriday

Technical Construction Manager

Mark Ferriday is a seasoned Senior Architectural Technician and Technical Manager in Modular Construction. He brings 33 years of expertise, holding qualifications such as Ordinary and Higher National Certificates and a BSc. (Hons) in Architectural Technology.

Design Team

Roberto Palmer

Head Of Design

As Head of Design, Roberto collaborates with the Noble+Eaton team, blending education, design, and construction. With his 30 years of experience, he employs diverse tools, from hand sketching to 3D modelling, to bring concepts to life.

Ian Felgate

Lead Architect | Brookes Architects

Ian is a qualified architect of nearly 30 years. He has extensive experience of delivering production information packages and running building contracts on site, including dealing with construction disputes and adjudications.

Emma Penson

Planning Consultant | DWD Planners

Emma, partner at DWD, is a Chartered Surveyor (MRICS) and Chartered Town Planner (MRTPI). Her wealth of experience includes, planning feasibility, preparing and submitting planning applications, development viability, site assembly, complex valuation advice. She is also a member of the Compulsory Purchase Association and a RICS Registered Valuer.

Juliet Niha

Technical Designer

With over ten years of experience as a technical designer, driven by her passion for precision and design excellence, Juliet translates ideas into technical drawings.

Delivery Team

Greg Howarth Hough

Head Of Project Delivery

With expertise in Construction Project Management at Envoplan and as a Construction Advisor in the Royal Engineers, Greg brings over 12 years of experience to the team. APM and PRINCE 2 qualified; he draws satisfaction from a balanced final aesthetic and the correct construction sequence in getting there.

Ryan Dent

Pre-Construction Manager

Verifying preparations for each stage of construction.

Adam Bentham

Senior Project Manager

Overseeing the Construction Phase of projects, thriving on bringing different skillsets together to form something greater than the sum of the parts.

Matthew Egan

CEO & Founder | Modularize

Matthew is the CEO & Founder of Modularize, where he helps construction leaders build smarter by designing and deploying building systems that maximise value and productivity.

Health and Safety Policy Statement

In accordance with its duty under Section 2(3) of the Health and Safety at Work etc. Act 1974 and in fulfilling its obligations to both employees and the public who may be affected by its activities, the Directors of Envoplan Ltd have produced the following statement of policy in respect of health and safety.

It is our aim to achieve a working environment which is free of work-related accidents, incidents and ill-health and to this end we will pursue continuing improvements from year to year.

We undertake to discharge our statutory duties by:

- Complying with applicable legal requirements, and with other requirements to which Envoplan Ltd subscribes that relate to its OH&S hazards.
- Identifying hazards in the workplace, assessing the risks related to them and implementing appropriate preventative and protective measures.
- Providing and maintaining safe work equipment.
- Establishing and enforcing safe methods of work.
- Recruiting and appointing personnel who have the skills, abilities and competence commensurate with their role and level of responsibility.
- Ensuring that tasks given to employees are within their skills, knowledge and ability to perform.
- Ensuring that technical competence is maintained through the provision of refresher training as appropriate.
- Promoting awareness of health and safety and of good practice through the effective communications of relevant information, ensuring all persons within Envoplan Ltd are made aware of their individual OH&S responsibilities.
- Identifying opportunities and needs for continual improvement of OH&S performance and the prevention of injury and ill health.
- Furnishing sufficient funds needed to meet these objectives.
- Ensuring that health and safety will not be compromised for other objectives.

All employees on their part are encouraged to contribute actively towards achieving a work environment that is free of accidents, incidents and ill health.

Our health and safety policy will be reviewed periodically to monitor its effectiveness and to ensure that it remains relevant and appropriate to the organisation.

This statement is to be read in conjunction with the responsibilities, arrangements, procedures and guidance that together form the health and safety policy for Envoplan Ltd.

ENVIRONMENTAL POLICY

Envoplan Ltd (the 'Organisation') recognises the importance of environmental protection and is committed to operating its business responsibly and in fulfilment of its compliance obligations. It is the Organisation's declared policy to operate with and to maintain good relations with relevant regulatory bodies.

It is the Organisation's objective to carry out all necessary activities, to protect the environment and to continually improve the Environmental Management System through the implementation of the following:

- Assess and regularly re-assess the environmental effects of the Organisation's activities
- Training of employees in environmental issues
- Minimise the production of waste
- Minimise material wastage
- Minimise energy wastage
- Promote the use of recyclable and renewable materials
- Prevent pollution in all its forms
- Control noise emissions from operations
- Minimise the risk to the general public and employees from operations and activities undertaken by the Organisation.

Top management demonstrates leadership and commitment with respect to the Environmental Management System by:

- Taking accountability for the effectiveness of the Environmental Management System
- Ensuring that the Environmental Policy and Environmental Objectives are established and are compatible with the strategic direction and the context of the Organisation
- Ensuring the integration of the Environmental Management System requirements into the Organisation's business processes
- Ensuring that the resources needed for the Environmental Management System are available
- Communicating the importance of effective environmental management and of conforming to the Environmental Management System requirements
- Ensuring that the Environmental Management System achieves its intended outcomes
- Directing and supporting persons to contribute to the effectiveness of the Environmental Management System
- Promoting continual improvement
- Supporting other relevant management roles to demonstrate their leadership as it applies to their areas of responsibility.

The Environmental Policy is communicated to all employees, external providers and other interested parties.

The Policy is regularly reviewed in order to ensure its continuing suitability.
