

ZEROGRAM

Our Work with Schools

Our Company

Zerogram operates as a business that gauges success by quantifying and mitigating carbon emissions for our clientele.

With a comprehensive network comprising more than 30 industry specialists, Zerogram offers a spectrum of expertise encompassing decarbonisation strategy, advisory services, smart local energy systems, energy infrastructure, renewable technologies, heat decarbonisation measures, energy management, and energy systems integration.

Cumulatively, our team boasts over 250 years of industry experience. Our mission is to facilitate every organisation, regardless of size, realise their aspirations to achieve Net Zero emissions, leveraging tailored resourcing and technical proficiency.

PURPOSE

Our purpose is to help all schools achieve their net zero targets in a cost effective manner to make the transition practical and affordable

VISION

Our vision is to ensure that every school working towards achieving Net Zero emissions has access to high-quality expertise to facilitate a swift transition.

MISSION

Our mission is to fight to limit the temperature rise below 1.5°C.

Our Services

Strategy and Advisory

Decarbonisation roadmaps and feasibility studies to create investment plans.

Carbon Reporting & Compliance

Carbon reporting support in line with sector GHG reporting requirements.

Scope 3 Emissions

Scope 3 emissions reporting, management and reduction strategies

Decarbonisation Resource

Secondment of specialist expertise to complement your in-house team.

Local Area Energy

District wide energy modelling to review large scale decarbonisation opportunities

Smart Local Energy Systems

Optimise generation, distribution & consumption of direct energy at a regional scale.

Our Team

Prash is an engineer by background with Masters in Sustainable Energy Systems from the University of Edinburgh. He has worked in the energy and carbon industry for over 13 years both as a senior consultant and a business development director.

Prash Kidiyoor
Managing Director

For over 30 years, David has held influential positions, across the energy utility, IT, and climate change industries. David advises a number of public and private stakeholders on the energy transition to a decarbonised, digital, distribution system.

David Healey
Technical Director, Smart Local Energy Systems

An experienced building Services, Energy and Carbon Consultant with over 30 years of experience in practical carbon reduction and energy engineering solutions. Specialises in Net-Zero pathway and strategic decarbonisation project development.

Simon Tilleard
Technical Director, Decarbonisation

A Decarbonisation Consultant with Chemical Engineering degree, carbon management experience, and a Master's in Environmental and Energy Engineering. Conducts technical assessments and develops decarbonisation strategies.

Mayur Bali
Decarbonisation Consultant

Case Study: Truro High School

Zerogram were appointed by Truro High School for girls to help them decarbonise their estate. They have a significant challenge with ageing estates and therefore needed some specialist advise to help them overcome these challenges by breaking the overall problem into simple, practical steps in the form of a prioritised action list.

The board of governors and other stakeholders were grateful for our input and strategic direction provided. The school now have a much better understanding of an action plan that is required to achieve net zero emissions whilst being able to provide best in class education service.

“*Zerogram's expertise and commitment to sustainability has played a pivotal role in helping us tackle the challenge of ageing assets and formulate a comprehensive decarbonisation programme.*”

Client Testimonial

“It's always great to have a plan! and I am so delighted we are moving purposefully forward to a better future with the support of Zerogram. Prash Kidiyoor we are hugely thankful for the outstanding work your team has done in developing a decarbonisation roadmap for Truro High School for Girls. Zerogram's expertise and commitment to sustainability has played a pivotal role in helping us tackle the challenge of ageing assets and formulate a comprehensive decarbonisation programme.

The roadmap crafted by Zerogram not only addresses our unique needs but also provides a clear and strategic plan to navigate the complexities of decarbonisation. The team's professionalism, attention to detail, and innovative solutions have been instrumental in shaping a sustainable future for our school. Zerogram's collaborative approach and transparent communication have made this partnership a true pleasure. The insights and recommendations provided have given us a solid foundation to work from, instilling confidence in our ability to achieve meaningful and lasting change.

We are truly grateful for Zerogram's dedication to environmental stewardship and their role in empowering Truro High School for Girls to take bold steps towards a greener, more sustainable future. Thank you for your exceptional work, and we look forward to continuing this journey together.”
